AIR8025DEEL-IP5M-Z

Concept Pro 5MP IP Enhanced Low Light Motorised External Large Bullet Camera

The AIR8025DEEL-IP5M-Z model is an IP camera that has been designed to deliver the highest image quality for long-range external environments. This external large bullet features a motorised lens, smart infrared LEDs with 80m illumination range, and provides crisp 5-megapixel video. It comes equipped with alarm and audio functionality as well as a power output for the most advanced installation needs. This camera is also designed for excellent compatibility with the Concept Pro range of network video recorders.

Deep Learning Motion Detection

Reduce false motion detection alarms by up to 95% using new Deep Learning Motion Detection technology. Trained with deep learning algorithms, the camera can recognise and trigger motion detection events only if a person is detected in the specified area. As a result, false alarms from sources such as lights, animals, foliage, weather, and other objects are effectively filtered and reduced.

Intelligent, Efficient Bit Rate Control

Reduce camera streaming bit rates by up to 90% by using Variable Bit Rate (VBR) or VBR+ smart bit rate control settings. These dynamic features maximise overall image quality while minimising camera stream bit rates. This results in lower network bandwidth usage and extended recording storage retention time.

DC12V Power Output

This CCTV camera also provides a DC12V 100mA power output that can be conveniently used to power some auxiliary equipment rather than using a separate power supply adapter.

Number Plate Capture

Configure the camera to operate as a Number Plate Capture camera at up to 30m/70mph with just a few simple configurations.
