Concept Pro 5MP IP Enhanced Low Light Motorised External Turret Camera

The CVP9316DEIREL-IP5M-Z model is an IP camera that has been designed to deliver the highest image quality for demanding external environments. This weather-resistant external turret features a 2.8-8mm motorised lens, smart infrared LEDs with 30m illumination range, and provides crisp 5-megapixel video. It comes equipped with alarm and audio functionality for the most advanced installation needs. This camera is also designed for excellent compatibility with the Concept Pro range of network video recorders.

**DEEP LEARNING MOTION DETECTION**

Deep Learning Motion Detection

Reduce false motion detection alarms by up to 95% using new Deep Learning Motion Detection technology. Trained with deep learning algorithms, the camera can recognise and trigger motion detection events only if a person is detected in the specified area. As a result, false alarms from sources such as lights, animals, foliage, weather, and other objects are effectively filtered and reduced.

VBR+

Intelligent, Efficient Bit Rate Control

Reduce camera streaming bit rates by up to 90% by using Variable Bit Rate (VBR) or VBR+ smart bit rate control settings. These dynamic features maximise overall image quality while minimising camera stream bit rates. This results in lower network bandwidth usage and extended recording storage retention time.

Enhanced Low Light Performance

This model utilises an Enhanced Low Light CMOS sensor with greater light sensitivity, resulting in the camera capturing colour images long after standard CCTV cameras have switched to black & white night mode and brighter images in darker conditions.
