Concept Pro IP Thermal Camera Range

Concept Pro Thermal Range is great for long range video surveillance and monitoring multiple areas for temperature detection, supporting 17 display modes to highlight temperatures within the scene. Make use of the area temperature detection function where 20 individual areas can be set to detect and alarm based on exceeding a temperature or temperature differences. The Deep Learning Analytics in camera allow improved accuracy to not only locate heat spots that might indicate humans or vehicles, but confirm if they are in fact Humans or Vehicles.

Infrared Thermal Imaging

Without any available light source the Thermal Imaging Camera will detect infrared radiation in any weather condition to produce high definition crisp images.

Deep Learning Video Analytics

Utilise Deep Learning analytics with thermal cameras to improve the security on site. The Thermal camera can alert you when a possible object of interest is a significant distance away. The Deep Learning analytics can alert you if that object of interest is a person or vehicle as they get closer.

NDAA Compliant

This product uses the latest in chipset technology from Taiwan and is developed without the use of restricted components ensuring the product is NDAA compliant
